Input	Josh	Nagare	Adam	Anthony	Ben	Philip	Final	Things we discussed
Tasks I want to add		Other members "setting related tasks"			Users with disabilities able to personalise app			Separate Hamburger from "+-". Remove Hamburger. Move "+-" to where "!" is
Tasks I want to subtract	Remove Timetable from horizontal menu as it will placed in route planning.	'Timetable', 'Profile' to one UI something combined 'Timetable', 'Profile' and 'Setting'						Moving "!". -> top right
Tasks I want to modify	Potientally change color for alert notifications							Adding setting, "?" Move Search bar to fill space left by hamburger menu. Add Settings cog to right of search bar ->setting in toolbar ->"?" as help in settings menu
Components I want to add		Consistent HELP and BACK button			Back button on Route Information screen as well as title for Route Info at top of screen to maintain consistency			Moving timetable in route
Components I want to subtract		Hamburger if we are having setting somewhere						We like the Color palette, but make a select color consistent
Components I want to modify			Alert Info Screen: Does mini screen violate minimalism heuristic. By using full screen, could reduce clutter / noise.Also may violate consistency heuristic as other screens wor differently					Font is "Inter"
								Merge the transportation preference setting. from main menu? route menu? or both? -> both
Decisions								Back button and title Information to all screen
Color palette	use current Green for select yellow for alert							
Font	Inter							
Tasks
